

4 March 2013

Slides not available for uploading – by the speaker.

ALL MEMBERS
SINGAPORE ACTUARIAL SOCIETY

We are pleased to welcome Mark Hoogendijk to speak on the Use of Derivatives by Life Insurance Companies globally.

The focus of the talk is on the many reasons why Insurance companies apply derivatives to their books and which instruments they commonly use. Mark will highlight the relevant key topics in Risk Management, Investment Diversification, access to international markets, ALM & Capital Optimization.

Different Derivative instruments will also be discussed as these could be of interest given the possible changes under RBC II in Singapore

Cost : Free for paid up Members (please login with your **Username** before signing-up), full-time students showing student identification.

Non-Members : S\$30, cheque payable to Singapore Actuarial Society.

Please pre-register as the seats are limited.

Priority will be given to paid up members who have pre-registered and then to others who have pre-registered and finally, if any seats remain, to those who do not pre-register based on their order of arrival.

If you would like to attend, please register by signing up ONLINE at this link [[SAS Afternoon Talk](#)] by 25 February 2013.

The speaker for this talk is Mark Hoogendijk. Mark is a Managing Director of E8 Consulting Asia: a Derivatives Research & Consultancy firm with a core expertise in the Life Insurance Sector.

Prior to founding E8 Consulting Asia, Mark worked for more than 12yrs within various Investment Banks as a Derivative Specialist & Advisor for Financial Institutions. Mark has worked with many Insurance companies here locally in Singapore and in countries such as Taiwan, Hong Kong & Australia.

Mark holds a Masters in Chemical Engineering from the University of Technology in the Netherlands. He is a CAIA charterholder, a CFA charterholder and a member of the Hong Kong Society of Financial Analysts.

Thank you
