

**Actuaries
Institute.**

The [Actuaries Institute](#) represents, educates, and connects a growing community of Australian actuaries within Australia and globally. The Institute is renowned for providing expert public comment, its strong relationship with government and regulators, and its legislative agnostic education program.

We support actuaries at each stage of their career via practice committees, microcredentials and short courses, mentor programs, networking events and meet ups, insights sessions and professional standard production.

About actuaries

[Actuaries use data for good](#) by harnessing the evidence to navigate into the future and make a positive impact. They think deeply about the issue at hand, whether it's advising on commercial strategy, influencing policy, or designing new products. Actuaries are adept at balancing interests of stakeholders, clients, and communities. They are called upon to give insight on complex problems, they will look at the full picture. Actuaries analyse the data and model scenarios to form robust and outcome-centred advice.

Our members work in a wide range of areas like data science and AI, Insurance, climate change and sustainability, e-commerce, superannuation, investments and banking, agribusiness and more.

Please visit our booth at the career fair to find out more about our [Education Program](#) and [Fellowship Pathway](#).
